Google
Verified Customer Reviews
⭐⭐⭐⭐⭐

"Used Protec IT for many years supporting our private Mental Health Hospital with hardware infrastructure and desktop support. Latterly, using them to support with IT project management for hardware and software development projects.

Always found Leigh and his team to be extremely responsive, helpful and competent. This was particularly appreciated by users who were less comfortable with IT and on hardware infrastructure and projects. Happy to recommend this company."
Cardinal Clinic

"Skyworld Aviation has used the services of Protec IT Solutions Ltd for over 15 years, and we couldn't be more happy with the service Leigh and his team provides. They are always quick to respond to all of our 'IT' issues and tend to have queries & problems sorted in a slick and timely manner. Would highly recommended."
Skyworld Aviation

IT Maintenance

Built to suit your requirements

Our agreements combine live network monitoring, proactive maintenance services and reactive day-to-day support services, all of which are focused on helping you run your business in the most efficient and secure way possible. With our maintenance agreements you get the assurance of our attention to detail across your entire IT provision and complete peace of mind as we take responsibility for all your IT needs.

PROTEC

Cyber Security

Keeping you secure against daily threats

Protec provides peace of mind by managing all of your Cyber Security needs, safeguarding your business against ever evolving threats.

✓ **End Point Protection:**
Providing a critical layer of security for devices connected to your network, such as laptops, smartphones, and desktops. End Point Protection helps prevent cyber threats like malware, ransomware, and phishing attacks by monitoring and controlling device activity. With features like real-time threat detection, data encryption, and remote device management, endpoint protection reduces the risk of data breaches and ensures business continuity.

✓ **User Cyber Security Awareness Training:**
Protec has partnered with KnowBe4, the worlds largest Security Awareness providers. We believe in empowering your team to be the first line of defence. Our customized training programs ensure that your employees are well-informed about the latest cyber threats and best practices for security.

✓ **Data Encryption and Privacy:**
We implement robust encryption protocols to ensure the confidentiality and integrity of your sensitive data, meeting the highest standards for privacy compliance.

Project Management

Strategic investments into new technology, we add value at every step with our project management skills and experience

Helping our clients scope and deliver IT projects into their business adds real world measurable benefits. Correctly scoping the project requirements at the start of the project is critical to ensure the solutions delivered align with the business needs and objectives. We work closely with our clients throughout the projects to ensure milestones are tracked and projects are kept to the agreed timelines and budget.
